Mineral Blend

- **Benefits:** Provides essential minerals like magnesium chloride, zinc, manganese and copper gluconate that support various bodily functions, including immune health, bone health, and muscle function. It can also help with reducing inflammation and promoting overall wellness. This essential blend of minerals helps reverse the effects of dehydration, remove toxins and replenish vitamins.
- **Usage:** Administered via injection or intravenously, often as part of a comprehensive health regimen.
- **Potential Side Effect:** Usually well-tolerated, with rare cases of mild injection site reactions.

Biotin (B7)

- **Benefits:** Supports healthy hair, skin, and nails. It also plays a role in converting food into energy, which can help with overall metabolism. Additionally, biotin is believed to have anti-inflammatory effects, improve cognitive function, improve nerve damage, raise HDL (good) cholesterol and lower LDL (bad) cholesterol.
- **Usage:** Administered via injection or intravenously, often included in beauty and wellness regimens.
- **Potential Side Effects:** Generally well-tolerated, with rare cases of mild digestive issues, skin reactions, headache and joint pain.

NAD (Nicotinamide Adenine Dinucleotide)

- **Benefits:** Plays a crucial role in cellular energy production and repair. It can help improve mental clarity, reduce fatigue, and support overall cellular health.
- **Usage:** Administered via injection or intravenously, often as part of anti-aging or wellness therapies.
- **Potential Side Effects:** Generally well-tolerated, but some may experience mild flushing, dizziness, headache or discomfort at the injection site.

B12

- **Benefits:** Boosts energy levels, supports brain health, and aids in red blood cell formation. Its especially beneficial for those with B12 deficiency, vegetarians, and those looking to increase their energy.
- **Usage:** Typically administered via injection but can be administered intravenously, dosage and frequency can vary based on individual needs.
- **Potential Side Effects:** Generally well-tolerated, but some may experience headache, nausea or mild injection site reaction.

B-Complex (B1, B2, B3, B6)

- **Benefits:** Supports energy production, improves mood, and enhances cognitive function. It can also help with maintaining healthy skin and muscle tone.
- **Usage:** Typically administered via injection or intravenously, depending on the specific formulation and client needs.
- **Potential Side Effects:** Generally safe, but some may experience mild digestive issues or injection site discomfort.

Glutathione

- **Benefits:** Powerful antioxidant that helps detoxify the body, supports immune function, and promotes skin health. Its known for its anti-aging properties and can help reduce oxidative stress.
- **Usage:** Administered via injection or intravenously, often in a series of treatments for optimal results.
- **Potential Side Effects:** Usually well-tolerated, but some may experience mild discomfort at the injection site or allergic reaction.

Tri-Immune

- **Benefits:** A blend designed to boost the immune system, often containing a mix of Vitamin C, Zinc, and Glutathione. This combination helps reduce inflammation, supports immune function, and enhances overall wellness.
- **Usage:** Typically administered via injection, often in a series to maintain optimal immune support.
- **Potential Side Effects:** Generally well-tolerated, but may include mild injection site reactions.

Amino Blend

- **Benefits:** Provides essential amino acids that support muscle growth, enhance recovery, and improve overall physical performance. It's beneficial for those looking to build muscle, recover from workouts, or improve overall health. May help boost your metabolism, improve energy levels, increase endurance, and help to burn fat.
- **Usage:** Administered via injection or intravenously, often as part of a fitness or wellness regimen.
- **Potential Side Effects:** Generally well-tolerated, with rare cases of mild injection site discomfort.

D3

- **Benefits:** Supports bone health, boosts the immune system, and can improve mood. Its especially important for individuals with limited sun exposure or those at risk of deficiency.
- **Usage:** Administered via injection, depending on the specifics needs of the client.
- **Potential Side Effects:** Generally well-tolerated, but excessive amounts can lead to hypercalcemia, so monitoring levels is important.

Vitamin C

- **Benefits:** A powerful antioxidant that boosts the immune system, promotes healthy skin, and aids in the absorption of iron. It can also help reduce the duration and severity of colds.
- **Usage:** Administered via injection or intravenously, often as part of an immune-boosting or skin enhancement regimen.
- **Potential Side Effects:** Generally well-tolerated, but high doses can cause digestive discomfort in some individuals.

L-Carnitine

- **Benefits:** Supports energy production by helping transport fatty acids into the cells' mitochondria. It can aid in weight loss, improve exercise performance, and support heart health.
- **Usage:** Administered via injection or intravenously, often used as part of a weight management or fitness regimen.
- **Potential Side Effects:** Generally well-tolerated, but some may experience mild digestive issues or a fishy body odor.

MICC (Methionine, Inositol, Choline, and Cyanocobalamin)

- **Benefits:** Often referred to as “fat burning” injections. MICC helps in breaking down fats in the liver, enhancing metabolism, and promoting weight loss. It also supports liver function and boosts energy levels.
- **Usage:** Administered via injection, typically as part of a weight management program.
- **Potential Side Effects:** Generally well-tolerated, but some may experience mild injection site discomfort.

Lipo-B

- **Benefits:** A combination of lipotropic compounds, including methionine, inositol, and choline, designed to help with fat metabolism and weight loss. It also includes Vitamin B12 for an added energy boost.
- **Usage:** Administered via injection, often as part of a weight management or wellness program.
- **Potential Side Effects:** Generally well-tolerated, but some may experience mild injection site discomfort.

Lipo-C w/ Levocarnitine

- **Benefits:** Contains methionine that breaks down fat and prevent fat buildup. Inositol helps metabolize fat and reduce cholesterol. Choline supports the liver health and fat metabolism. Levocarnitine enhances fat-to-energy conversion, boosts stamina, and supports muscle recovery. Overall improves energy and endurance for workouts. Accelerates fat metabolism and weight loss. Reduces muscle fatigue and supports recovery. Supports liver health and detoxification.
- **Usage:** Administered via injection, typically as part of a weight management or wellness program.
- **Potential Side Effects:** Generally well tolerated, but some may experience mild injection site discomfort. Nausea, diarrhea, or stomach discomfort may occur.

Zofran (Ondansetron)

- **Benefits:** A medication used to prevent and treat nausea and vomiting, commonly associated with surgery, chemotherapy, or other medical treatments, Zofran works by blocking serotonin receptors in the brain and gut.
- **Usage:** Administered via injection. Dosage tailored to individual needs based on the condition being treated.
- **Potential Side Effects:** Generally well-tolerated, but some may experience headaches, dizziness, constipation, or fatigue.

Toradol (Ketorolac)

- **Benefits:** A nonsteroidal anti-inflammatory drug (NSAID) used for short-term relief of moderate to severe pain. Toradol is highly effective for treating acute pain without the risks associated with opioids, making it a valuable option for post-surgical or injury-related pain management.
- **Usage:** Administered via oral tablets, intramuscular, or intravenous injection. Typically used for short-term treatment (up to 5 days) to minimize the risk of side effects.
- **Potential Side Effects:** Common nausea, upset stomach, headache, or drowsiness. Rare but serious Gastrointestinal bleeding, kidney problems, or allergic reactions.

Myers Cocktail

- **Benefits:** Boost Immunity, improve energy levels, rehydrate, alleviate symptoms of various conditions, support nutrition absorption, and promotes healthy skin. **Myers Cocktail** typically includes Vitamin C, B Vitamins (B1,B2,B3,B5,B6,B12), Magnesium, Calcium, Vitamin D, Zinc, and Sodium Chloride(used as a base for hydration, helping balance electrolytes).
- **Usage:** Administered via injection or intravenously. The frequency of treatment varies, but some people uses it monthly or bi-weekly for general health and wellness.
- **Possible Side Effects:** Generally well-tolerated, but some may experience soreness or discomfort at the injection site or feel lightheaded or dizzy after the infusion.

Fat Burner Blend:

AOD-9604/MOTS-C/Tesamorelin

The overall benefit of the blend supports weight loss has fat-burning properties without influencing blood sugar levels.

AOD-9404: A peptide that helps promote fat burning and weight loss by mimicking the way natural growth hormone regulates fat metabolism. It can assist in reducing body fat without affecting blood sugar levels or tissue growth.

MOTS-C: A mitochondrial-derived peptides that enhances cellular energy, improves insulin sensitivity, and supports weight loss. It can help improve physical performance and metabolic health.

Tesamorelin: A growth hormone-releasing peptide that stimulates the pituitary gland to release growth hormone, which helps reduce visceral fat, improve metabolism, and support muscle growth. Commonly used for those looking to manage body composition.

Fat Burner Plus Blend:

AOD-9604/MOTS-C/Tesamorelin/Ipamorelin

AOD-9404: A peptide that helps promote fat burning and weight loss by mimicking the way natural growth hormone regulates fat metabolism. It can assist in reducing body fat without affecting blood sugar levels or tissue growth.

MOTS-C: A mitochondrial-derived peptides that enhances cellular energy, improves insulin sensitivity, and supports weight loss. It can help improve physical performance and metabolic health.

Tesamorelin: A growth hormone-releasing peptide that stimulates the pituitary gland to release growth hormone, which helps reduce visceral fat, improve metabolism, and support muscle growth. Commonly used for those looking to manage body composition.

Ipamorelin: It promotes fat loss, improves muscle recovery, enhances sleep quality, and supports anti-aging by increasing collagen production and cellular repair.

Recovery Blend 1:

GHK-Cu/BPC-157/TB500/KPV

GHK-Cu: A peptide that promotes skin regeneration, wound healing, and collagen production. It also has anti-inflammatory properties and can improve hair health and overall skin appearance.

BPC-157: A synthetic peptide derived from a natural protein found in the stomach. It is known for its powerful healing properties, promoting tissue repair.

TB-500: Accelerates wound healing, reduces inflammation, and enhances tissue regeneration. It is often used to improve mobility and recovery in joints, tendons, and muscles.

KPV: A potent anti-inflammatory peptide that promotes gut healing, skin health, and overall immune modulation.

Recovery Blend 2:

BPC-157/TB500/KPV

BPC-157: A synthetic peptide derived from a natural protein found in the stomach. It is known for its powerful healing properties, promoting tissue repair.

TB500: Accelerates wound healing, reduces inflammation, and enhances tissue regeneration. It is often used to improve mobility and recovery in joints, tendons, and muscles.

KPV: A potent anti-inflammatory peptide that promotes gut healing, skin health, and overall immune modulation.

Performance Blend:

CJC-1295/Ipamorelin

CJC-1295: Promotes fat loss, muscle growth, improved recovery, better sleep, and anti-aging benefits such as enhanced skin elasticity and collagen production.

Ipamorelin: Promotes fat loss, improves muscle recovery, enhances sleep quality, and supports anti-aging by increasing collagen production and cellular repair.

Cognitive Blend:

SEMAX/SELANK

SEMAX: Enhanced Cognitive Function: Improves memory, focus, and mental clarity.

Stress Reduction: Helps manage stress and reduces anxiety.

Neuroprotection: Protects the brain from oxidative stress and promotes healing after injury.

Mood Enhancement: Positively influences mood and energy levels.

SELANK: Its benefits include:

Anxiolytic Effects: Reduces anxiety without causing sedation or dependence.

Improved Cognitive Function: Enhances learning, memory, and focus.

Immune Modulation: Supports immune system regulation.

Mood Stabilization: Helps maintain emotional balance.

Build Blend:

IGF-1/LR3

IGF-1/LR3: A modified form of IGF-1 with a longer half-life, promoting muscle growth, enhanced recovery, and fat loss. IGF-1 LR3 improves cell growth and repair, making it beneficial for those seeking increased muscle mass, improved endurance, and anti-aging benefits.

Fountain of Youth

Epitalon/GHK-Cu

Epitalon: Known for its anti-aging properties, improving sleep quality, boosting immune function, and potentially extending, lifespan.

GHK-Cu: A peptide that promotes skin regeneration, wound healing, and collagen production. It also has anti-inflammatory properties and can improve hair health and overall skin appearance.

Tirzepatide

- **Benefit:** Helps with substantial weight reduction by decreasing appetite and promoting caloric deficit. In trials, patients lost up to 22.5% of their body weight, making it one of the most effective medications for obesity. Delays gastric emptying, making people feel full for longer. Reduces cravings and emotional eating tendencies. May lower blood pressure and cholesterol levels. Potential to reduce cardiovascular disease risk, though further studies are ongoing.
- **Usage:** Administered subcutaneous (under the skin) injection in stomach, thigh, or upper arm. Once-weekly injection, making it more convenient than daily medications.
- **Potential Side Effects:** While Tirzepatide is well-tolerated by many, some users experience mild nausea, vomiting, diarrhea or constipation, loss of appetite, and mild stomach pain.

Semaglutide

- **Benefit:** Suppresses appetite by acting on the brain's hunger centers. Promotes fullness (satiety) by slowing digestion. Clinical trials show up to 15-17% body weight reduction, making it effective for obesity. Reduces the risk of heart disease, stroke, and heart attack (proven in cardiovascular trials). Lowers blood pressure and cholesterol levels. Helps control hunger and reduce binge eating
- **Usage:** Starts at 0.25mg gradually increasing up to 2.4mg per week. Administered subcutaneous (under the skin) injection in the abdomen, thigh, or upper arm. Once-weekly injection, making it more convenient than daily medications.
- **Potential Side Effects:** While Semaglutide is well-tolerated by many, some users experience mild nausea, vomiting, diarrhea or constipation, bloating and fatigue.

IV NUTRIENT INFUSIONS

DESIGNED FOR OPTIMAL HEALTH AND WELLNESS

1

REHYDRATE QUENCH

Hydrate and combat fatigue
from dehydration

Ascorbic Acid 50 mg/ml | B1 & B3 @
10 mg B2, B5 & B6 @ 2mg/ml |
MagnesiumCL 80mg, Zinc 1 mg,
Manganese .02mg, Copper .2mg,
Selenium 8mcg/ml

2

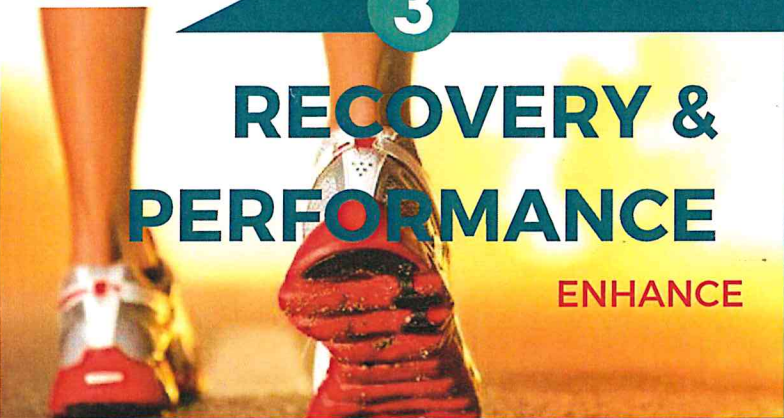

BOOST GET-UP-AND-GO

Burn fat, feel energized and
boost your metabolism

B1 & B3 @ 10 mg B2, B5 & B6 @ 2mg/ml
| Glutamine 30mg, Arginine 10 mg,
Ornithine 50mg, Lysine 50mg,
Citrulline 50mg, Carnitine 10 mg/ml

3

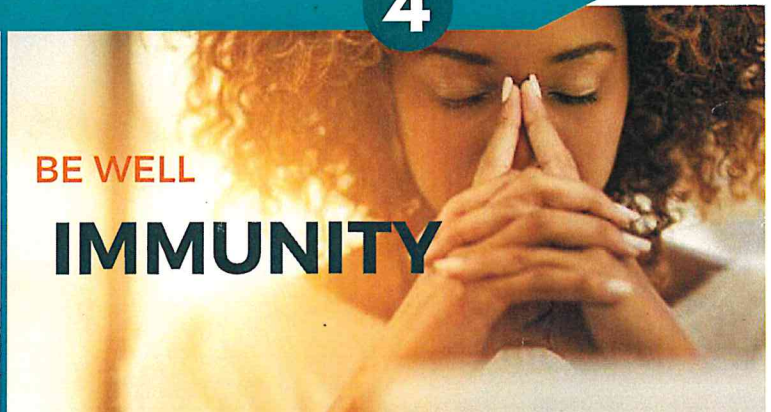

RECOVERY & PERFORMANCE

ENHANCE

Decrease recovery time &
enhance your performance

Ascorbic Acid 50 mg/ml | B1 & B3 @ 10 mg
B2, B5 & B6 @ 2mg/ml | Glutamine 30mg,
Arginine 10 mg, Ornithine 50mg, Lysine
50mg, Citrulline 50mg, Carnitine 10 mg/ml |
MagnesiumCL 80mg, Zinc 1mg, Manganese
.02 mg, Copper .2 mg, Selenium 8mcg/ml

4

BE WELL

IMMUNITY

Boost your immune system,
feel better faster

Ascorbic Acid 50 mg/ml |
B1 & B3 @ 10 mg/ml B2, B5 & B6 @
2mg/ml | Zinc Chloride .5mg/ml

IV NUTRIENT INFUSIONS

DESIGNED FOR OPTIMAL HEALTH AND WELLNESS

5

ALLEVIATE

RELIEF

Minimize bloating, irritability, abdominal discomfort and lower back pain

Calcium Chloride 10 mg/ml |
Magnesium Chloride 20 mg/ml | B1 & B3 @
10 mg B2, B5 & B6 @ 2mg/ml |
Hydroxocobalamin B12 1mg/ml

6

Fight acne, wrinkles and tired skin from the inside out

Ascorbic Acid 50 mg/ml | B1 & B3 @
10 mg B2, B5 & B6 @ 2mg/ml | Biotin
.5mg/ml

GLOW

INNER BEAUTY

7

WELLNESS

MYERS' COCKTAIL

"Gold Standard" for overall wellness

MagnesiumCL @ 9.65mg/ml,
B1 @ 1.62 mg/ml, B2 @ 3.23 mg/ml,
B3 @ 1.62 mg/ml, B5 @ 4.07mg/ml,
B6 @ 1.63mg/ml, B12 Hydroxo @
.1mg/ml, Calcium Gluc @ 4.03mg/ml,
Ascorbic Acid @ 64.4mg/ml

Olympia's IV Nutrient Infusions are used to deliver vitamins and minerals directly into the bloodstream, offering superior absorption over oral supplements. We offer several pre-formulated customized solutions to address a variety of issues, including:

- Immune system strengthening
- Anti-aging
- Optimal athletic performance and recovery
- Metabolism
- Hangover and headache relief
- Cold and flu symptoms
- Chronic fatigue
- Brain fog

IV NUTRIENT INFUSIONS

DESIGNED FOR OPTIMAL HEALTH AND WELLNESS

8

Clarity NAD +

Mental clarity, antiaging support

Nicotinamide Adenine Dinucleotide
| 50 mg per lyophilized vial

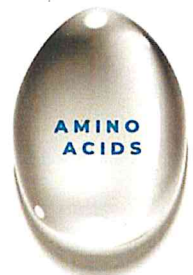

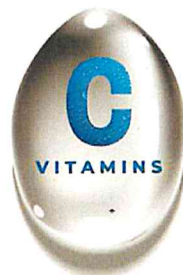

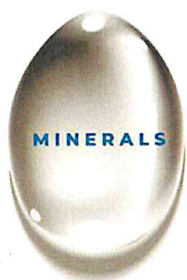

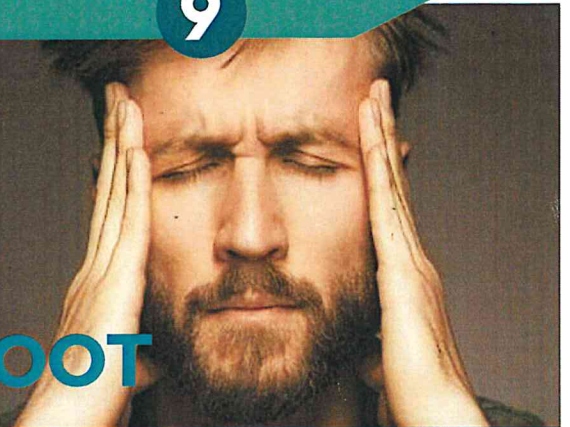

9

**Ease hangover headache,
nausea and dehydration**

Ondansetron 1mg/ml | B1 & B3 @ 10 mg
B2, B5 & B6 @ 2mg/ml | MagnesiumCL
80mg, Zinc 1 mg, Manganese .02mg,
Copper .2mg, Selenium 8mcg/ml

RELIEF

REBOOT

Olympia's IV Nutrient Infusions are used to deliver vitamins and minerals directly into the bloodstream, offering superior absorption over oral supplements. We offer several pre-formulated customized solutions to address a variety of issues, including:

- Immune system strengthening
- Anti-aging
- Optimal athletic performance and recovery
- Metabolism
- Hangover and headache relief
- Cold and flu symptoms
- Chronic fatigue
- Brain fog

We also offer a range of other services, including fillers, tox, skin treatments, lipodissolve, and more!
